Steel Parts

Wedge-Mill Tool has a long history of machining many grades of alloy steel, carbon steel, stainless steel and high speed steel. We stock many of these grades in-house to expedite your delivery. Our black oxide system and state of the art laser marking machine enables WMT to deliver a complete quality product.

Cutting Tools

Since Wedge-Mill Tool began in 1982, our company has been manufacturing quality cutting tools for the metal removal manufacturers. Many of the types of cutting tools include, but not limited to, serrated blades for grind-type cutters and form tools in high speed steel, solid carbide and carbide-tipped designs.

parts and tooling requirements.*

Aluminum Parts

Wedge-Mill Tool specializes in machining aluminum in a variety of shapes and sizes. We have developed long-term relationships with many aluminum suppliers to ensure that you receive the best price and delivery for your part.

Plastic Parts

Wedge-Mill Tool has the experience and equipment to machine a variety of plastic materials. Whether you need one piece or one thousand, WMT is your dependable source for quality plastic parts.

www.wedgemill.com

Our company has been supplying a wide variety of parts to manufacturing companies for over 25 years, and our capabilities have grown with the needs of our customers. WMT has the people and technology to machine complex, tight-tolerance, sophisticated products from aluminum, plastic and a variety of steels and non-ferrous metals. We can handle any quantity from a single rapid prototype to thousands of parts.
